

THE ARMFIELD LINK

SEPTEMBER 1991

COMMUNITY UPDATE

By Steve Kellam

Now that School is beginning, people need to SLOW DOWN!! If you are one of the people that use our neighborhood roads as a raceway, this note is meant for YOU!! Over the Summer, there have been far too many residents that have exceeded the speed limit within our development. We are really lucky that one of our many children haven't been hit! Shorter days are on the way with daylight arriving late and darkness arriving earlier. So please SLOW DOWN and watch out for children.

The Developer of Saville Chase is busy making corrections to property in Section 1. They are working to get the bond released by Fairfax County. So if you notice a common property problem such as drainage difficulties or dangerous debris left about, let Richmarr know. If you want to make sure the County knows about the problem before they release the bond, you can call the County. Richmarr's phone number is 393-8080. The County numbers are: Fairfax Bond Release at 246-1590 or Code Enforcement at 352-0863 (presumably if you call Code Enforcement, the problem has to be resolved prior to bond release.) If you have problems with a builder on your individual home and property, that is an issue between the homeowner and the builder. The Association has no authority in these types of matters.

At times with new homeowners in the community, it is important to remind people what the authority of your Association entails. The Board of Directors derives their authority

from the Governing Documents of the Association and the Virginia Property Owners Act. You should have received pertinent documents when you purchased a house in Armfield. The Association basically enforces architectural and other rules laid out in the documents. We also serve as the body that manages the common ground and all of the common facilities from the pool to the trails. The Board of Directors is made up of volunteers who were voted in for three year terms by the members of the Association. This governing body is composed of 5 members. In turn, these members elect a President, Vice President, Secretary and Treasurer from within the Board. We also appoint a Board member to oversee the various committees. These include the Pool and Tennis, Community Relations, Grounds and Land Use Committees. We also have an Architectural Review Committee (ARC) which is separate from the Board with no Board member as a member. The members of the other committees are volunteers who are approved for membership by the Board. The ARC is composed of people appointed by the Board for 3 year terms. They elect their own Chairperson and meet as a separate entity from the Board. The business of the ARC is not discussed by, nor is the Board involved in the ARC's day to day dealings. This is to allow the board to serve as an impartial review when residents appeal a decision of the ARC. The board also has appointed a Neighborhood Watch Chairperson. This individual serves as the Board's representative in leading the volunteers for Neighborhood Watch and contacting the Police. Each one of the committee heads is listed on the back page of this

Newsletter. If you are interested in finding out more about a committee or joining a committee, you can call the person in charge of that committee for information.

The Board also hires various firms on recommendations of committees and based upon a competitive solicitation. The Board has the William Marr law firm as the attorney for the Association. They also have Armstrong Management Services (Wes Schroeder is our Management Agent) as the firm that is responsible for the overall management of Armfield. Day to day inquiries or problems of the residents should be brought to Wes Schroeder's attention at 385-1133 extension 212. This firm is responsible for all administrative matters that it takes to run the Association. This includes collections, disbursements and communicating with residents. We also hire a management firm for the pool. This year, the firm was Crystal Aquatics. The other large management contract is one we placed with Green Thumb this year for grounds maintenance. At times, other contractors will be hired for specific jobs within the Association.

One area the Association has little authority over as derived from legal documents is the enforcement of County, State or Federal laws. When it comes to criminal behavior of residents such as drug use, property damage, theft, etc..., these are matters for the authorities. The Association has not ignored this area, and for that reason, we have Neighborhood Watch. So, if you are concerned with illegal activity in the neighborhood, please contact the

Fairfax County Police. You can also join the Neighborhood Watch Program and learn the proper procedures. To find out more about the Neighborhood Watch, you can call Bill Bailey 437-6108. Don't expect the Management company or the Association to deal with criminal matters directly.

If you have any questions about this very limited explanation of the Association's responsibilities, you can call me, Wes, or a Board member.

LAND USE COMMITTEE

By Steve Kellam

There is really nothing new to report. The Route 28 Task Force is supposed to start meeting in earnest beginning in January. The committee will keep you informed of any issues. Don't forget to make sure you become educated on the Supervisor election. There are many people running for the position in Sully and they all have different opinions on various issues. Understand these positions and VOTE!

OCTOBERFEST

The Social Committee is planning an Autumn Party for October. Music, hayrides, food and games. If you would like to help plan this special event, please call:

Heather Ambrose 689-3735

TO ALL SWIM TEAM VOLUNTEERS

I would like to write to each of you individually but time doesn't permit, so please accept my gratitude in this "open letter." First, I want to thank you for your generous gift certificate to Westfield's. When things quiet down at the Burger house (translation: when the kids go back to School!), Walt and I will take advantage of it and we THANK YOU!

I feel we had a great season and that is due to the commitment of many people, especially you. A swim team cannot be run without parents and our success is proof that you worked hard and long.

The Swim Team is not only a service to the swimmers and their families, but to the whole community. Evidence of that is the volunteers we had who don't even have children on the Team!

You all should give yourselves a pat on the back for a job well done. I know I couldn't have done my job without all of your help. It's been such a pleasure to have people call me and ask how they can help. I can't tell you how refreshing and heartening that is to me! I hope you will continue (as I will) giving your love and time to our children.

Thank you again,

Joanne Burger

Security & Safety Inspections

On a home security inspection, Police Officers will check locks on doors and windows, outside lighting and other safety features.

During a fire safety inspection, a home's electrical outlets and smoke detectors are among the items examined by fire fighters and members of the Fire Marshall's staff.

I would like to relate a personal story to you. Last week, a friend of mine who lives in Dale City, received an emergency phone call. He has an alarm system and outside lights for security. He left for work around 4:30 a.m. and at 5:15 he received a call from home saying a man was at the window peering in and possibly trying to open it. She called 911. Fortunately the man left. But the moral of the story is: my friend did not have the lights or alarm system on! The Police stated to him that the outside lights would have helped deter this incident alone and a lot of people fail to turn their alarm systems on. Sometimes, people leave for 5 - 10 minutes thinking it is safe and they get robbed.

Remember, if you have outside lights, the back light helps especially if you have a common area behind your home, but restrict the lights to your yard.

CRIME SOLVERS

Fairfax County Police Department
10600 Page Avenue
Fairfax, Virginia 22030

FAIRFAX COUNTY CRIME SOLVERS NEEDS YOUR HELP TO LOCATE THE MAN WHO ASSAULTED AND RAPED A 23 YEAR OLD WOMAN. ON THURSDAY, JULY 11, 1991 THE VICTIM AND A FRIEND HAD BEEN AT SEPTEMBER'S AT THE FAIR OAKS HOLIDAY INN, WHICH IS LOCATED IN THE 11000 BLOCK OF LEE JACKSON MEMORIAL HIGHWAY. WHILE THEY WERE AT THE ESTABLISHMENT, THE SUSPECT MADE ADVANCES TOWARDS THEM THROUGHOUT THE NIGHT WHICH WERE REJECTED. AROUND 2:00 AM THE WOMEN LEFT AND THE SUSPECT OFFERED THEM A RIDE. THE VICTIM'S FRIEND WAS DRIVEN TO HER CAR AND THE SUSPECT THEN DROVE THE VICTIM TO AN ADJACENT PARKING LOT AT THE FAIR OAKS MALL. THE SUSPECT REQUESTED THE VICTIM TO PERFORM A SEXUAL ACT. WHEN SHE REFUSED, HE TORE OFF HER CLOTHES. THE VICTIM BROKE FREE AND FLED FROM THE VEHICLE, BUT WAS CAUGHT BY THE SUSPECT, THEN PUNCHED IN THE FACE AND RAPED. THE SUSPECT IS DESCRIBED AS BLACK, IN HIS TWENTIES, ABOUT SIX FEET IN HIEGHT, WEIGHING ABOUT 150 POUNDS, WITH A SHORT BLACK AFRO. THE SUSPECT WAS DRIVING A RED TOYOTA MR2. ANYONE WITH INFORMATION ON THIS CRIME OR WHO BELIEVES THEY MAY KNOW WHO THE RAPIST IS, IS ASKED TO CALL CRIME SOLVERS AT (703-691-8888 (OR TOLL FREE 1-800-673-2777). CALLERS NEVER HAVE TO GIVE THEIR NAMES, JUST THE INFORMATION. IF YOUR TIP LEADS TO THE ARREST AND INDICTMENT IN THIS CASE YOU WILL RECEIVE A \$1000 CASH REWARD.

POOL AND TENNIS NEWS

By Todd Jackson

Labor Day witnessed the close of the season. Thanks should be extended to many people for volunteering time and energy to the community. A partial list includes Leye Chrzanowski for years of work and for setting all the gears in motion for this swim season, Joanne Burger for her driving energy behind the swim team and Heather Ambrose for orchestrating the summer pool parties.

Now that the pool season is concluded, planning and maintenance will begin for next year. A crack in the pool house wall will be repaired this month. In addition, the pool management contract will be updated and let for bid for next Summer. I would like to receive your comments on pool operations, the pool management company, and any suggestions for next year. Please contact me at 435-8599 with comments, or if you are interested in joining the homeowners Pool Committee (requires less than 1 hour per month.)

Obviously, the backup tennis court key is no longer available from the pool desk. Keys may be obtained from Armstrong Management for a \$5 key deposit.

GROUNDS COMMITTEE

By Paul F. Malherek

David Carmen of Media General Cable has advised he is nearly finished obtaining easements from the homeowners of Section I of Saville Chase and that residents of Section I should have Cable TV by "Halloween".

Earlier this year, we advised you that we had been told by the Fairfax County Department of Extension and Continuing Education that Gypsy Moths had not been identified as a problem in the area served by the Armfield Homeowners Association. However, in a letter dated July 26, 1991, the County has advised us to remain vigilant, especially during the months of August and September, in looking for evidence of gypsy moth infestations.

Attached to this Newsletter is a copy of the letter dated July 26, 1991, received from Fairfax County, Department of Extension and Continuing Education, regarding the Gypsy Moth Program. Enclosed with the letter is a survey form to be used to notify the Fairfax County Government if you find such evidence in your neighborhood. Please read this information carefully, and if applicable, forward the enclosed survey form to the Fairfax County Department of Extension and Continuing Education, Gypsy Moth Program, 11212 Waples Mill Road, Fairfax, Virginia 22030. Remember, the deadline for any such reporting is October 1, 1991.

The two major insect pests of turf grass in Virginia are Japanese Beetle Grubs and Sod Webworms. White grubs feed on the roots of grass, killing the grass from below; sod webworm caterpillars feed on the blades of grass, killing it from above.

DO NOT, DO NOT use beetle traps because the use of the traps actually increases beetle activity by 40% when traps are used! Jokingly, Virginia Cooperative Extension Service says if you have a beetle trap, put it in a neighbor's yard, all the beetles will be attracted to their yard!

COMMONWEALTH OF VIRGINIA

July 26, 1991

Dear President/Community Representative:

This is the most important letter the Gypsy Moth Staff will send you all year. The reason this letter is so important is that it deals with finding gypsy moth infestations which need to be treated next Spring. Clearly, if we do not find infestations that need to be treated, we will not treat them next Spring. The Gypsy Moth Staff needs your help in finding gypsy moth infestations.

The months of August and September are the most important months for locating gypsy moth infestations. The Gypsy Moth Staff collects raw data used for planning next year's treatment blocks until October 1, 1991. During October we will formulate the plan for treatment next Spring. By November 1, 1991 this plan is complete and can no longer be changed since by that time it is approved by the Fairfax County Board of Supervisors and is then forwarded to the State of Virginia which contracts for resources to accomplish the treatment plan. Citizen infestation reports cause our staff to examine areas of citizen concern in detail. Many reports from a single community ensure that the community will not be overlooked.

The most reliable method for predicting next Spring's infestations is to locate and count gypsy moth egg masses in August and September.

From now until October, the Gypsy Moth Staff will conduct several thousand surveys throughout the County to locate egg masses. We will conduct an egg mass survey every 2,000 feet County-wide. This systematic point survey grid will be supplemented with additional surveys to locate the boundaries of high infestations. Nevertheless, our survey effort averages one or two surveys each 100 acres, and we can overlook smaller, localized infestations.

A community-wide egg mass survey effort by your community would be tremendously helpful to us and our planning effort and to you and your community. If each landowner in your community counted gypsy moth egg masses and accurately reported results to us, we would have near perfect raw data to use for treatment planning.

(over)

If egg masses that can be reached are destroyed, your community can reduce significantly next Spring's caterpillar populations. Destruction of gypsy moth egg masses is an effective, environmentally sound, and cost effective method for controlling the gypsy moth. A community-wide egg mass survey and destruction program is important and worthwhile for your community.

The Fairfax County Gypsy Moth Suppression Program is based on strict biological criteria involving tree-damaging pest infestations and tree habitat. The gypsy moth has never been eradicated from a generally infested area such as Fairfax County and Northern Virginia. The County program seeks to reduce high gypsy moth populations below tree-damaging levels. The use of biological criteria for treatment means that your community may have an infestation that does not meet criteria for treatment. The County may not treat your area because it does not meet biological treatment criteria.

An advantage of a community-wide egg mass survey now is that cost effective, private treatment using the most environmentally sound pesticides can be arranged if the County will not treat your community. Private aerial and ground treatment are available. Early arrangements are essential for such treatment. A map showing next year's treatment plan will be available by the end of January, 1992. This map is placed in libraries, governmental centers and the Gypsy Moth Office. If your community is not included in the County treatment plan, February is a good time to arrange for private treatment. Last year several communities in Fairfax County opted for such an arrangement and were highly satisfied with the results.

The Gypsy Moth Staff is eager to assist your community as much as possible. We can be helpful by:

- o Providing you with additional information.
- o Speaking at a meeting of your community at your convenience.
- o Providing technical assistance regarding egg mass surveys, destruction of egg masses, and/or arrangements for private treatment.
- o Providing you with egg mass survey forms such as the one attached for use by landowners in your community.

Our telephone number until August 16, 1991 is 246-5304. On August 19, 1991 and after, the telephone number will be 324-5304.

Sincerely,

Troy Shaw

Gypsy Moth Program Coordinator

The gypsy moth is currently the most serious insect threat of forests, woodlands, shade trees and landscape plants in the United States. Fairfax County established an Integrated Pest Management (IPM) Program in 1982 because of the damaging effects of this insect. The IPM approach includes the use of a variety of biological, mechanical and chemical suppression methods. Searching out, scraping off and destroying gypsy moth egg masses on your property is a very effective mechanical method of managing this insect pest.

WHAT TO LOOK FOR: Gypsy moth egg masses are a rich tan color, approximately 1-1/2 inches long by 3/4 inches wide, and covered with a dense coating of tiny hairs. They typically resemble a small piece of chamomile cloth. Each egg mass may contain 500-1,000 eggs!

WHEN TO LOOK: Egg laying occurs soon after the moths mate. Egg masses are typically laid in July and August. Egg masses are resistant to sub-zero temperatures and survive through the winter hatching the following spring.

WHERE TO LOOK: Egg masses are often found on trunks of trees, in crevices, or under loose bark, especially of preferred host trees which include oak, beech, willow, apple and birch. They can also be found on or under objects such as limbs, rocks, stumps, buildings, vehicles, lawn and patio furniture, decks, toys, wood piles, lawn ornaments, wooden fences, birdhouses, and especially ivy on trees, etc.

WHAT TO DO: To destroy egg masses, scrape them into a container and add soapy water, letting them soak for at least 24 hours. **DO NOT SIMPLY SCRAPE EGG MASSES ONTO THE GROUND, THEY WILL STILL HATCH IN THE SPRING!** Record your findings on the report form in this brochure and return it to the Gypsy Moth Program by October 1st.

IMPORTANT TIPS

Egg masses that appear faded, tattered and spongy, were laid last year, have already hatched out, and should not be counted this year as they pose no threat.

Avoid direct contact of skin with egg masses as the coating of hairs may cause an allergic reaction in some people. When scraping off egg masses, use a putty knife or spoon, etc. If you have sensitive skin, use gloves.

Do not spray egg masses with any type of insecticide. This will only kill a few eggs, if any. It will kill beneficial insects that parasitize gypsy moth egg masses.

Do several searches when you are able, including next spring. You may find egg masses that were missed on previous searches.

When conducting searches, you may wish to consider using binoculars to look up into your trees and count any egg masses that cannot be seen with the naked eye.

Encourage your neighbors and friends to search, scrape, destroy and report egg masses. You'll be doing them and yourself a favor!

Be sure to search every "nook and cranny" on your property. Egg masses can be found anywhere.

If there are many egg masses which you cannot reach, don't be discouraged from scraping whatever you can. Remember, for each egg mass you scrape and destroy, you are eliminating hundreds of future caterpillars and protecting your trees. It's well worth your effort!

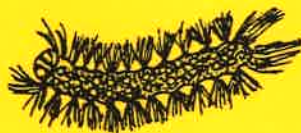

Please do not exaggerate your counts. Doing so will not be helpful in any way.

PLEASE RETURN COUPON BY OCTOBER 1st

GYPSY MOTH LIFE STAGES

CATERPILLAR (April - June)

- Caterpillars have five pair of blue dots and six pair of red dots on their backs.
- They have many tufts of stiff hairs.
- They do not make webs or "tents".

PUPAE (June - July)

- Pupae are dark brown.

Male
(smaller)

Female
(Larger)

ADULT MOTHS (July - August)

- The male is brown and about the size of a quarter.
- The female is white with brown wavy markings. She does not fly.

Male

Female

EGG MASS

(Laid July - August & will hatch the following spring)

- Egg masses are a rich tan color and covered with a dense coating of tiny hairs.
- They are about the size of a quarter.

FAIRFAX COUNTY DEPARTMENT OF EXTENSION AND CONTINUING EDUCATION
GYPSY MOTH PROGRAM
11212 Waples Mill Road
Fairfax, VA 22030

The purpose of this annual survey is to provide the Fairfax County Gypsy Moth Program with additional gypsy moth egg mass data. Annual surveys are necessary because gypsy moth population levels fluctuate from year to year. This survey data aids Program staff in determining gypsy moth population levels throughout the County. The information you provide is also very important and useful to staff in decision-making about future gypsy moth suppression actions designed to manage the gypsy moth in Fairfax County. **PLEASE NOTE THAT PARTICIPATION IN THIS SURVEY IS GREATLY APPRECIATED BUT IS NOT AN APPLICATION OR GUARANTEE FOR INCLUSION IN THE COUNTY'S AERIAL SPRAY PROGRAM NEXT SPRING.**

As you carry out your search, scrape and destroy activity, please keep a count of all egg masses you are able to see, whether you can reach to destroy them or not.

Please record your final count when completing the report form below and return it to the Gypsy Moth Program by October 1st.

Please do not be concerned about destroying egg masses before Gypsy Moth Program staff complete their own County-wide field survey. Staff are trained to recognize areas of infestation even after you have destroyed all egg masses you are able to reach on your property.

Your participation in the Search, Scrape, & Destroy Campaign is a commendable effort that benefits everyone. Together we can make a difference and help to keep Fairfax County green.

SWIM TEAM

By Joanne Burger

Well, we did it and did a great job of it!!!! The swimmers have been terrific and we were all lucky they were lead and coached by Garth and Kim (they plan to return next year!) We had 13 swimmers qualify for the League-wide All Star Meet, as opposed to 4 last year. If you see these swimmers, please congratulate them on their hard work:

| | | |
|------------------|---------------|------------|
| Casie McCarthy | breast stroke | 2nd place |
| | back stroke | 5th place |
| | I.M. | 6th place |
| Jason Smith | back stroke | 9th place |
| | I.M. | 9th place |
| Eben Buxton | back stroke | 12th place |
| | I.M. | 7th place |
| James Mowatt | breast stroke | 7th place |
| Ryan Gill | breast stroke | 5th place |
| John Jurcheck | breast stroke | 7th place |
| Matt Carbone | free style | 3rd place |
| Erin McMorow | breast stroke | 4th place |
| Madeline Guscott | back stroke | 11th place |
| Melanie Guscott | breast stroke | 8th place |

(In addition, Garth, Paul Adams and Peter Cho qualified, but were unable to attend.)

The enthusiasm of the swimmers, coaches and parents showed throughout the season. We had a bigger and better team than last year and hope to improve even more next year! If you have any ideas or suggestions toward that goal, please call me at 437-8359. I truly enjoyed this past season and hope to see all of you back next year and we'd love to see new faces, too! Thanks to all who made this year such a great success!
